

FoodieBus

Complete System Proposal & Financial Quotation

Project: Multi-Vendor Food & Transit Platform	Currency: Malawian Kwacha (MWK)	Date: July 2026
Target Platforms: Mobile App & Web Dashboards	Integrations: PayChangu, SMS, WhatsApp	Document Version: 1.0 Final

Executive Summary

FoodieBus is a comprehensive multi-vendor platform combining campus food ordering and intercity bus ticketing with role-based dashboards for admins, financial officers, restaurant owners, bus operators, and students. This is a full-stack enterprise system with real-time order processing, payment integration, advanced analytics, and multi-channel notifications.

The system has been designed to handle multiple vendors, thousands of users, and complex business logic across two distinct service lines (food & transport). The pricing reflects the sophistication, scalability, and professional-grade quality of the solution.

CORE MODULES & COMPONENT BREAKDOWN

#	MODULE & SPECIFICATIONS	COST (MWK)
01	User Management & Authentication Module Handles student identity, staff accounts, and access roles across the platform. - Multi-role accounts (Super Admin, Admin, Financial, Vendor, Operator, Student) - Secure login with email/student ID & password; Role-based access control - Staff hiring system (Super Admin creates & assigns roles to team members) - Password reset, account recovery, activity logging & audit trails	MWK 120,000
02	Food Management System (Restaurant/Vendor Dashboard) Allows cafeteria vendors to list items, structure categories, and manage orders. - Food category management (Meals, Breakfast, Snacks, Drinks) - Dish listing (name, description, photos, pricing in MWK) & availability toggle - Meal customization options & daily specials / promotional offers - Real-time order management & sales analytics dashboard	MWK 150,000
03	Bus Management System (Operator Dashboard) Manages bus routes, schedules, seat inventory, and ticket sales. - Route creation (origin, destination, stops) & schedule management - Seat inventory & pricing management with real-time tracking - Ticket sales overview, daily revenue reports & trip analytics - Bus fleet management & driver assignment/scheduling	MWK 150,000
04	Customer Mobile Application (Student Interface) Primary interface for students to order food and book bus tickets. - Food: Browse categories, cart controls, Pickup/Delivery choice, VIP tag, order tracking - Bus: Route search, schedule view, visual seat map selection, digital QR tickets - Cross: Unified cart (food + bus in one checkout), notifications, profile & ratings	MWK 130,000

#	MODULE & SPECIFICATIONS	COST (MWK)
05	Payment Integration Module (PayChangu) Secures local payment processing via mobile money and cards. • PayChangu API (Airtel Money, TNM Mpamba, Cards) with real-time verification • Digital PDF receipt generation & payment transaction logging • Multi-currency support (MWK, USD) & automatic fee calculation	MWK 200,000
06	Admin Dashboard (System Management) Centralized control panel for platform management and oversight. • User & staff management, onboarding & approval workflows • System settings (fees, percentages, limits), platform-wide analytics • Content management (banners, promos) & system health monitoring	MWK 220,000
07	Financial Dashboard (Revenue & Analytics) Comprehensive reporting tools for monitoring sales, fees, and operational performance. • Real-time MWK revenue dashboard with category breakdown • Comparative reports (VIP vs Standard), date range filters, export (PDF, CSV, Excel) • Platform commission tracking, reconciliation tools & trend analysis	MWK 250,000
08	Notification System (Multi-Channel) Automates communication to notify users, vendors, and operators. • In-App Notifications: Push notifications for status, ticket confirmations • SMS & WhatsApp: Automated order alerts, pickup notifications, dispatch alerts • Departure reminders, booking confirmations & promotional broadcasts	MWK 200,000
09	Delivery Management System (Basic) Manages campus delivery operations and runner coordination. • Runner onboarding, profile management & automatic order assignment • Status tracking, delivery zone mapping & earnings tracking	MWK 250,000
10	Advanced Analytics & Business Intelligence Deep insights for strategic business decisions. • Sales forecasting, customer behavior analytics & vendor benchmarking • Peak time analysis, revenue prediction models & custom report builder	MWK 180,000
11	UI/UX Design & Professional Branding Professional design for all interfaces ensuring premium user experience. • Custom mobile app design (Android-native feel) & 3 web dashboard designs • Branding integration (logo, colors, typography), design system & flow optimization	MWK 150,000
12	Testing, Quality Assurance & Deployment Ensures reliability, security, and smooth launch. • Functional, security & performance load testing across browsers/devices • Staging environment setup, production deployment & post-launch monitoring	MWK 200,000
13	Project Management, Training & Documentation Ensures smooth delivery and team readiness. • Dedicated project manager, weekly progress reports & milestone tracking • Staff training sessions, user manual, technical docs & 3 months support	MWK 200,000
